Some helpful Precursor Shortcuts or extra controls

Hold Shift + Control and draw from one object to another object to create arrows between them.

Hold Space and drag or scroll in order to pan horizontally or vertically

Select Text and Press - or + to increase or decrease its size

Some Thoughts
- use a landscape layout for some of the sections

Quick Links (click the number to be brought to what I'm talking about)

1. We can probably omit this from both versions since it is implied.
   Maybe replace this with: "We would love to work with you to bring your ideas to fruition."
2. We could just omit this functionality and have the user go to our archive if they want to see past articles.
3. We may want to point out that we are talking about our development process. Someone could think that our process applies to both of the services that we provide.
4. Other Ideas?
5. Link to the same sections on the previous page?
6. Suggest buying this theme for the detail page for Fresno Transit Free (already responsive)

Click to go home

(on this doc too)

Suggest buying the Atom theme from 3rd wave media and using it to make a nicer product detail page

(essentially using the template with details from our flier)

(integrates the notable review and compliment idea)

(integrate the template for the mobile app page into this page)
